ABSTRACT

The 53 tests cited in this bibliography are geared toward the elementary-secondary education level. Some of the tests are performance measures. Tests in the area of health include those which assess nutrition and other aspects of health. Some tests are appropriate for use with special populations. (Lists of measures related to drug knowledge and sex education are available separately.) Test subjects include the promotion of physical fitness; fitness programs, health-related nutritional behaviors, health habits; and safety rules. This document is one in a series of topical bibliographies from the Test Collection (TC) at Educational Testing Service (ETS) containing descriptions of more than 18,000 tests and other measurement devices prepared by commercial publishers, teachers, educational institutions, professional associations, departments of education, counselors, etc. Each description contains the following basic information: TC Accession Number (a six-digit identification number assigned by the Test Collection); the title of the instrument; personal or institutional author; year of publication or copyright; availability source; grade level for which test is suitable; age level for which test is suitable; and abstract. Other information, which is provided when known, includes subtests, number of test items, and time required to complete the test. Information on accessing the Test Collection via Internet concludes the document. (RMB)

INTRODUCTION

Scope of Bibliography

Most of the tests are geared toward the elementary-secondary education level. Some of the physical education tests are performance measures. Tests in the area of health include those which assess nutrition and other aspects of health. Some tests are appropriate for use with special populations. Separate lists of measures related to drug knowledge and sex education are available.

Availability

Copies of the tests described on the following pages must be obtained directly from the publisher, as stated in the AV AVAILABILITY section of each test citation. Generally, the Test Collection does not have distribution rights for its holdings. However, in special instances, the Test Collection has been granted permission from individual authors to distribute their tests, which are primarily research instruments. The AV AVAILABILITY information for these instruments will be Tests in microfiche, Test Collection, Educational Testing Service, Princeton, NJ 08541.

Guide to Citation Elements

The following is a guide to the various elements which may be present in a test citation:

AN - Six-digit identification number assigned by the Test Collection

TI - Name of the instrument

DT - Components within the overall test which assess particular skills or factors

AU - Personal or institutional author

YR - Year test was published or copyrighted

AV - Test publisher or distributor; the organization which sells or distributes the instrument

AB ABSTRACT: A self-rating scale developed and administered as part of a study to assess body elimination and to determine the structure and correlates of measured attitude in contemporary American society. Found to have good internal consistency and temporal stability.

Seven factors identified: Fecal Smell; Personal Hygiene, Sight, Dirty Hair, Animal Feces, Mucous-like Discharge and Sound. Greater disgust was found to be associated positively with psychopathology and to be related to various demographic variables. Future research appears to have promise in theoretical areas such as Freudian and other personality theories, in addition to having practical applications such as the selection of persons for certain occupations (physcians or veterinarians, for example).

TG TARGET AUDIENCE: Adults.
AB ABSTRACT: Test items developed specifically for use by educational agencies which offer a program in Home Health Assisting upon approval of the New York State Education Department. Items may be useful to other agencies or institutions. Home Health Assisting Program is designed to prepare adults to work in the home under supervision of a health-care agency. Focus is on the role of homemaker-personal care services provider and home health aide as members of an agency team in the care of a patient. Items selected may be used as a pretest, or achievement test. Areas covered by items include concepts of the world of work; home health and personal care services; communications and interpersonal relationships; household housekeeping and management services; nutritional status of patient and family; personal care services; patient care services; specialized home health care services; recognition of special patient handicaps.

AB ABSTRACT: Designed to show how an athlete responds affectively to competition. Shows how feelings and emotional responses change over time, before and during an event. At present, is an experimental test because predictive validity in indicating actual problems of athletes is still limited. The four scales include anxiety, how the athlete perceives his or her physiological and emotional tension; intensity, a measure of the athlete's feeling of being mentally ready to perform; concentration, the feeling of being able to focus on the task and think clearly; physical readiness, the athlete's feeling about his or her body.

AB ABSTRACT: Measures a student's basic knowledge of health and his ability to apply that knowledge. Includes the newer phases of health and many items on physical education. The basic-knowledge section uses multiple choice type of questions. The application-of-knowledge section presents four health problem situations; following each situation are a group of statements to which the respondent marks either true or false. While not timed, the authors suggest having the respondents start on the second section after 25 minutes. Intended for secondary school students and students in the first-year college hygiene classes.

ETS TEST COLLECTION VIA INTERNET

The ERIC Clearinghouse on Assessment and Evaluation has mounted on its gopher site a database to help locate tests. This database can be used by accessing the gopher at the address: GOPHER.CUA.EDU. The ERIC/ETS Test Collection is located under: Special Resources/ ERIC Clearinghouse on Assessment and Evaluation/ Test Locator/.

To search the database, enter keywords from the title or descriptors. For example, if you would like to search for tests on oral language proficiency, you could type in all three words, or oral and proficiency. You may get slightly different results, but you will have information on a lot of tests to look at. If you know the title of the test, the best way to search is to use the main words in the title, not necessarily all of the words in the title. If you are looking for the Wechsler Intelligence Scale for Children-Revised, the most efficient way to search is with the words Wechsler, intelligence, and children.

INTRODUCTION TO THE ETS TEST COLLECTION

The Educational Testing Service (ETS) Test Collection database contains records on over 9,500 tests and research instruments. These records describe the instruments and provide availability information. The Test Collection encompasses virtually all fields from vocational interest inventories for adults to instruments that measure shyness or predict recidivism in released criminal offenders, to assessment of managerial style, as well as education-related achievement and aptitude tests. The test descriptions are indexed with ERIC Thesaurus terms for subject accessibility.

This is a joint project of ETS and ERIC_AE. ETS Library and Reference Services Division prepares the descriptions. ERIC_AE maintains the database and hosts the Search System. ERIC_AE has also begun to put ETS prepared test descriptions into the ERIC *Resources in Education* database. About 15 descriptions are added each month.

You may download individual and small groups of test descriptions and you may point to this service from any Gopher Site.

WHAT KIND OF TEST ARE DESCRIBED?

The Test Collection database collects a variety of instruments: achievement tests, aptitude tests, personality measures, attitude measures, career/vocational interest measures, occupational tests such as nursing or sales skills inventories. Many research instruments are collected as well as tests from commercial publishers.

WHAT INFORMATION IS AVAILABLE ABOUT THE TESTS?

The title, author, publication date and source appear in the record. An abstract describing the instrument, intended population, and uses accompanies the record. Subject terms give the age and grade level information as well as ERIC Thesaurus terms that describe the test.

DOES THE TEST COLLECTION DATABASE REVIEW THE TESTS?

No, other reference guides such as Mental Measurements Yearbooks, Tests: A Comprehensive Reference for Assessments in Psychology, Education, and Business, and Test Critiques distributed by Pro-Ed fill that role. You can search the tables of contents for the MMY and Test Critiques through the ERIC_AE Gopher Site.

ARE ALL THE TESTS IN THE DATABASE CURRENTLY IN PRINT?

No, some of the items are out of print. We suggest contacting the publisher for permission to use out-of-print materials. Phone numbers can be located using another menu option on the ERIC_AE Gopher Site.

WHERE CAN I SEE THE ACTUAL TEST INSTRUMENTS?

Availability information is provided in the records. Many colleges and universities have test collections in their libraries. Talk to you local librarian for more information.

WHAT IS TESTS IN MICROFICHE?

Tests in Microfiche is a subcollection of unpublished research instruments that are available for purchase in microfiche from the ETS Test Collection. The collection includes instruments appropriate for diverse populations (infants, learning disabled, adults, etc.) Each set spans a wide range of topics such as job satisfaction and attitudes towards school. More than 800 tests are available.

DOES THE TEST COLLECTION PROVIDE REFERENCE SERVICES?

No, the descriptive information in the database should help answer most questions people may have. And the publisher of the particular test is the most competent source of information. You can, however, route general inquiries to ERIC_AE@CUA.EDU.
